SATHWIK KONIJETI

SOC ANALYST | CYBERSECURITY ANALYST

(616) 337-0568 | sathwikkms@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Cybersecurity analyst with hands-on SOC experience in Microsoft Sentinel, KQL alert triage, incident investigation, and Microsoft Defender for Endpoint. Experienced in Nessus vulnerability assessments, detection-rule reviews, and application account remediation involving centralized SSO. M.S. in Cybersecurity, earned TryHackMe SAL1 and Tines certifications, with CompTIA Security+ exam scheduled for November 2026.

TECHNICAL SKILLS

SIEM & Security Operations: Microsoft Sentinel, KQL, alert triage, incident investigation, incident escalation
Endpoint & Detection: Microsoft Defender for Endpoint (MDE), endpoint telemetry, MITRE ATT&CK
Vulnerability Management: Tenable Nessus, vulnerability assessments, remediation tracking
Identity & Access: Centralized SSO, application account migration, deduplication, PII handling, TeamDynamix
Automation & Development: Python, Tines SOAR, FastAPI, REST APIs, PostgreSQL, SQL, Git, SHAP
Systems & Networking: Windows, Linux, TCP/IP, DNS, phishing analysis, NIST CSF

PROFESSIONAL EXPERIENCE

Cybersecurity Analyst Intern, SOC Operations | Passion Vertex LLC | Aug 2026 - Present

- Triaged 25-40 Microsoft Sentinel alerts per shift using KQL to investigate activity and escalate suspicious events.
- Assisted with Nessus scans of internal and external hosts, documenting 15-30 high-risk findings per cycle.
- Correlated Sentinel, Defender for Endpoint, and authentication logs to investigate 3-6 security events weekly.
- Built incident timelines, validated IOCs, and supported senior analysts with containment and recovery activities.
- Supported senior-led Sentinel rule tuning, EDR policy reviews, and email security configuration changes.
- Prepared 1-3 monthly incident reports and dashboards on threat trends, vulnerabilities, and remediation status.

Technical Associate | Grand Valley State University | Sep 2023 - May 2026

- Supported account migrations for a departmental web application integrated with university SSO.
- Assisted with duplicate-account identification and removal to resolve application account inconsistencies.
- Troubleshot application login and account access issues involving centralized SSO authentication.
- Handled PII during account remediation and documented issues and resolutions in TeamDynamix.
- Updated remediation workbooks after issue resolution to maintain accurate account remediation records.
- Automated biweekly payroll submission reminders using a scheduled Tines workflow to notify team members.

TECHNICAL PROJECT

xIDS, Explainable Intrusion Detection System | Capstone & Extension | 2025-2026 | Source Code

- Developed an explainable IDS using Random Forest, XGBoost, MLP, and SHAP on NSL-KDD traffic.
- Evaluated three classifiers on official KDDTest+, achieving 84.20% best test accuracy.
- Built a Streamlit dashboard for traffic analysis, prediction review, and SHAP-based explanations.
- Extended xIDS using CICIDS2017, Isolation Forest, XGBoost, and TreeSHAP for network threat detection.
- Integrated AbuseIPDB, Claude API, and FastAPI with JWT authentication and analyst verdict tracking.

EDUCATION

M.S. in Cybersecurity | Grand Valley State University | May 2026
B.Tech in Aeronautical Engineering | Vel Tech University | 2022

CERTIFICATIONS & TRAINING

TryHackMe Security Analyst Level 1 (SAL1)
Tines SOAR Core Certification
Tines SOAR Advanced Certification
Anthropic Introduction to Model Context Protocol (MCP), Course Completion
CompTIA Security+ (Exam Scheduled: November 30, 2026)
